Education

Parul University

Bachelor of Technology in Computer Science & Engineering

Vadodara, Gujarat

2023 - Present

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, C++, SQL, Kotlin, Swift, Dart

Frameworks/Libraries: React.js, Next.js, Node.js, Express.js, Redux, Tailwind CSS, HTML/CSS

Concepts: MERN Stack, REST APIs, OOP, Data Structures & Algorithms

Mobile: Android (Kotlin), Jetpack Compose, MVVM, Hilt

Developer Tools: Git, GitHub, Docker, VS Code, Android Studio, Postman, Linux

Databases: MySQL, MongoDB, Firebase, Supabase

AI / Cloud: Google AI Studio, Gemini API, IBM Watson, Machine Learning, Deep Learning, NLP, Computer Vision, AWS

Projects

Echo Music | Kotlin, Jetpack Compose, MVVM, Hilt, REST API

[Download](#) | [GitHub](#)

Co-Founder & Active Contributor

- Co-founded an open-source Android YouTube Music client that has grown to 1,000,000+ downloads and 2,100+ GitHub stars.
- Built on MVVM + Hilt + Jetpack Compose so the codebase stays clean and contributors can jump in without getting lost.
- Shipped a sleep timer, audio quality controls, and Hindi localisation — all through open pull requests reviewed by the community.

GoldenHour | Kotlin, Jetpack Compose, MVVM, Hilt, Coroutines/Flow

[GitHub](#)

Emergency Response App for Road Accidents

- Built an Android app that walks a bystander through emergency response after a road accident — GPS-detected location, victim triage, and one-tap dialling to 108 (Ambulance) / 112 (Emergency) — while explaining their legal protection under India's Good Samaritan Law.
- Designed a hospital-side dashboard simulating live ambulance tracking, trauma team readiness, and AI-based severity triage, to show the complete bystander-to-hospital response flow.
- Built on MVVM + Repository architecture with Hilt dependency injection, Kotlin Coroutines/Flow, and Jetpack Compose — the same clean-architecture approach used in Echo Music.

CollabLearn | React, Node.js, MongoDB, Google AI Studio

[Live](#) | [GitHub](#)

Skill Learning Platform

- Built a full-stack skill-learning web app with AI-powered recommendations using the Gemini API — deployed live on Vercel.
- Cut Gemini API response time by 30% by adding the right MongoDB indexes — a small fix that made a noticeable difference in how fast the app felt.
- Set up Google OAuth2 login and Redux for state management across the app.

Experience

Software Engineering Intern

Hybrid / Mumbai

ZM Lifestyle

May 2024 – July 2024

- Worked with a 5-person team on the main product dashboard — built and shipped React.js features as part of the regular release cycle.
- Found and fixed 10+ bugs in the legacy codebase; stability went up by 15% and the error reports slowed down.
- Did daily stand-ups, reviewed teammates' PRs, and worked entirely in a Git/GitHub workflow — my first real experience of how production teams actually operate.

Achievements & Certifications

Member of Swift Coding Club

Coding Profile: Solved 300+ problems on LeetCode — Arrays, Trees, Graphs, DP [↗](#)

Certifications: AI Fundamentals with IBM SkillsBuild (Cisco, Sep 2025) · Artificial Intelligence Fundamentals (IBM SkillsBuild, Sep 2025) · AWS Academy Graduate: Cloud Foundations (AWS, Sep 2025) [↗](#)
